#### **DETAILED ACTION**

1. This Office Action is the answer to the amendment filed on 9/24/2007. Claims 1-19 are elected for examination without traverse; claims 20-38 are not elected for examination on the merit.

# **Drawings**

2. Seventeen sheets of formal drawings submitted on 2/06/2004 are accepted.

## Examiner's amendment:

- 3. An examiner's amendment to the record appears below. Withdrawal claims 20-38 would be canceled for this allowability. Should the changes and additions be unacceptable to applicants, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.
  - Claims 20-38 are now canceled.

### Allowable subject matter

4. Independent claim 1 is patentable over the closest references of Teramura Eiji et al. (Japanese publication no. 09-290665) and Niikura Hiroyuki et al. (Japanese publication no. 10-103097), because these documents do not make obvious the pending invention with teaching of:

A system for controlling an internal combustion engine having a plurality of cylinders and mounted on a vehicle, comprising:

an engine operation controller that conducts a switching control of engine operation based on a load of the engine between a full-cylinder operation in which all of the cylinders are operative and a cut-off cylinder operation in which some of the

J

cylinders are inoperative; wherein the engine operation controller outputs a first signal indicating a state of the switching control;

a running controller that conducts a running control including at least one of a cruise control in which the vehicle runs at a desired vehicle velocity and a preceding vehicle follow-up control in which the vehicle runs at a desired vehicle velocity to maintain a desired inter-vehicle distance from a preceding vehicle, wherein the running controller outputs a second signal indicating a state of the running control; and

an acceleration suppression controller that receives the first and second signals, and conducts an acceleration suppression control if the first signal indicates that the engine operation is switched from the cut-off cylinder operation to the full-cylinder operation and the second signal indicates that the running control is in progress.

5. Claims 2-19 are allowed because they are dependent on allowable claim 1.

## Conclusion

- 6. Claims 1-19 are allowed.
- 7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to CUONG H. NGUYEN whose telephone number is 571-272-6759. The examiner can normally be reached on 9:30 am 5:30 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, THOMAS G. BLACK can be reached on 571-272-6956. The Rightfax number for the organization where this application is assigned is 571-273-6956.
